1.0**

1. **We are done with the foolish elites ruining our planet for petty personal gain.**
We won't pick among elites—communists, plutocrats, dictators. We reject them all. We don't accept any unworthy elites as our masters.
2. **We are withdrawing our support from cruelty, evil, stupidity and insanity.**
We do not accept or obey rules, laws, or norms that are wrong; morality and not authority is our guide.
3. **We recognize our power and that power is nonviolent noncooperation.**
Historically, strategic nonviolent noncooperation has been the most effective path to positive change. We pledge to wield this enormous power for the good of all. We will prevent climate collapse by withholding labor from the fossil fuel industries.
4. **We will prevent climate collapse by withholding labor from the fossil fuel industries.** We will begin slowing down our work for fossil fuels. We will stop extracting, processing, shipping, selling, buying or burning fossil fuels. These fuels are death.
5. **We will increase our visibility and our numbers by tirelessly sharing our messages.**
We know that our cause is right, and will appeal to billions of people who are aware of the multiple crises and failure of leaders worldwide.
6. **We reject the "practical" values of greed and violence and selfishness, and embrace love, kindness and community.**
Ultimately, it is values that will transform the world. People everywhere are tired of the stupidity and cruelty they see. We will embrace and embody love.
7. **We recognize that our life is TIME and we won't waste our lives producing crap for the profit of undeserving elites.**
We are tired from endless decades of work—stupid and often destructive work. We will begin minimizing our work, and spend our time as human beings, not human resources.
8. **We begin NOW and will continue until we stabilize the climate and establish a sane, humane and sustainable society worldwide.**
We will join The Saners (at WeAreSaners.org/join) and spread the messages and take the necessary actions to create a better world.
